1. Introduction

Welcome to TERRA, your ultimate online platform for plant enthusiasts! This website is designed to connect individuals who are passionate about plants, offering a space where you can share your planting journey, purchase a wide variety of plants, and access detailed information about different plant species.

Whether you're a seasoned gardener or just starting your green journey, TERRA provides user-friendly features to help you grow and nurture your passion. This user manual will guide you through the website's functionalities, ensuring you make the most out of your experience. From posting updates about your garden to finding the perfect plant for your home, we've got everything covered.

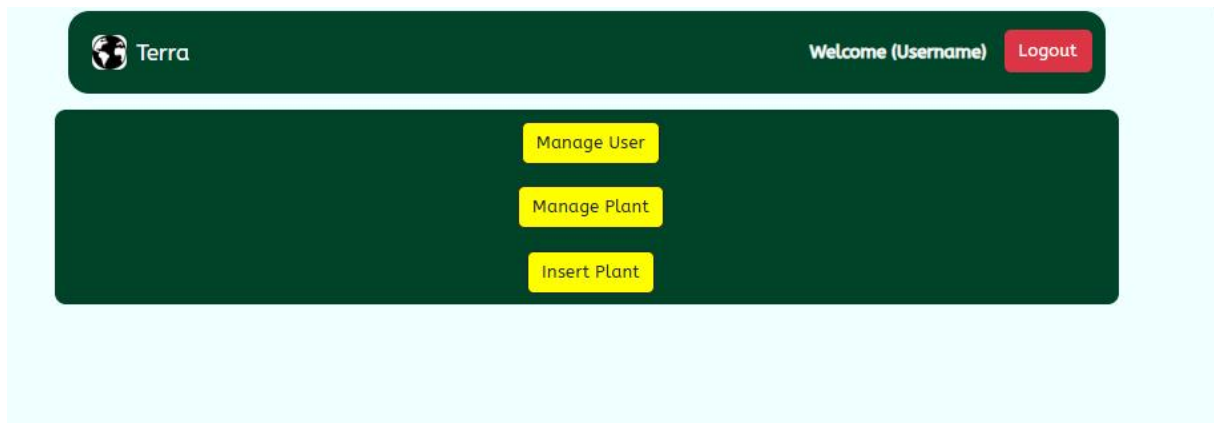

2. Admin

The screenshot displays the Terra website's administrator login interface. At the top, a dark green header bar contains the Terra logo on the left and navigation links for 'Member', 'Home', and a yellow 'Get in Touch' button on the right. The main content area has a dark green background with the title 'Administrator Access' in white. Below the title, a white text block reads: 'Welcome, Admin! Please log in to access the management tools and resources that help keep our community thriving. From overseeing user contributions to updating plant information and managing system settings, your role is essential to our success.' Centered on this background is a white login form with a red border. The form includes an 'Admin ID' field with the email 'haziq@gmail.com', a 'Password' field with masked characters '*****', and a yellow 'Login' button at the bottom. The footer of the page, in a light blue background, shows the copyright notice 'Copyright © 2024 Terra'.

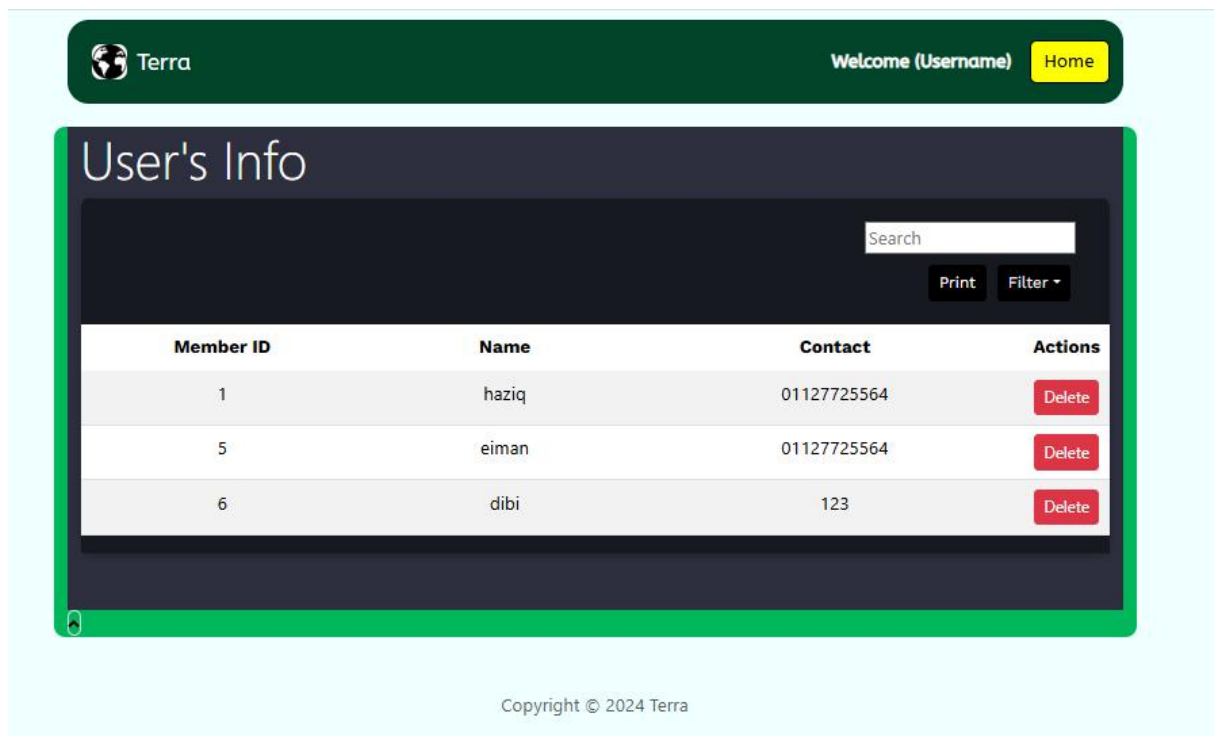

2.1 Admin Login Page

Enter the admin credentials to access their page. Admins is predefined in the system.

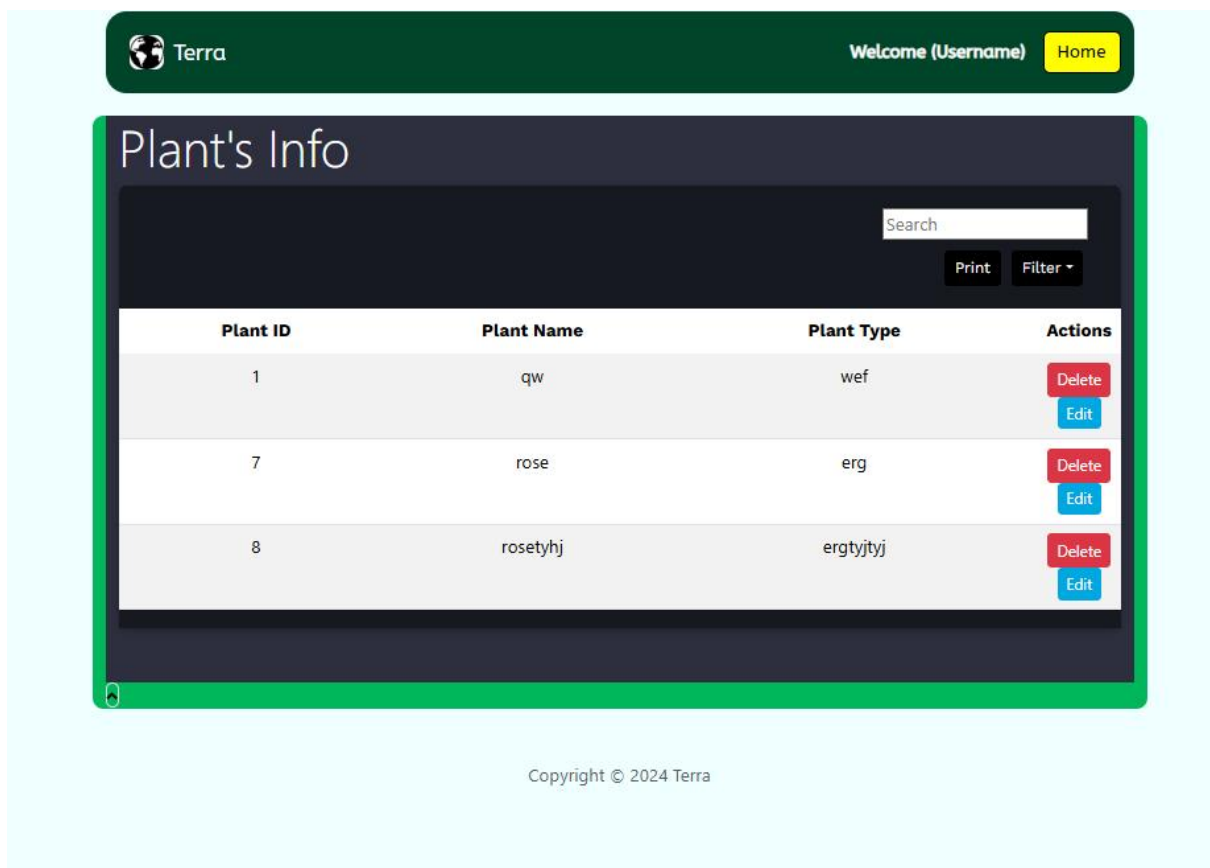

2.2 Admin Dashboard

After logging in, the system will redirect the admin into their dashboard. The dashboard will have buttons for each section.

2.3 Manage User

This page allows admin to manage User by deleting user account if there any issues on the account.

2.4 Manage Plant

Admin can manage plant by delete or edit the plant if needed

Edit Plant Details

Plant ID

Plant Name

Plant Description

Plant Type

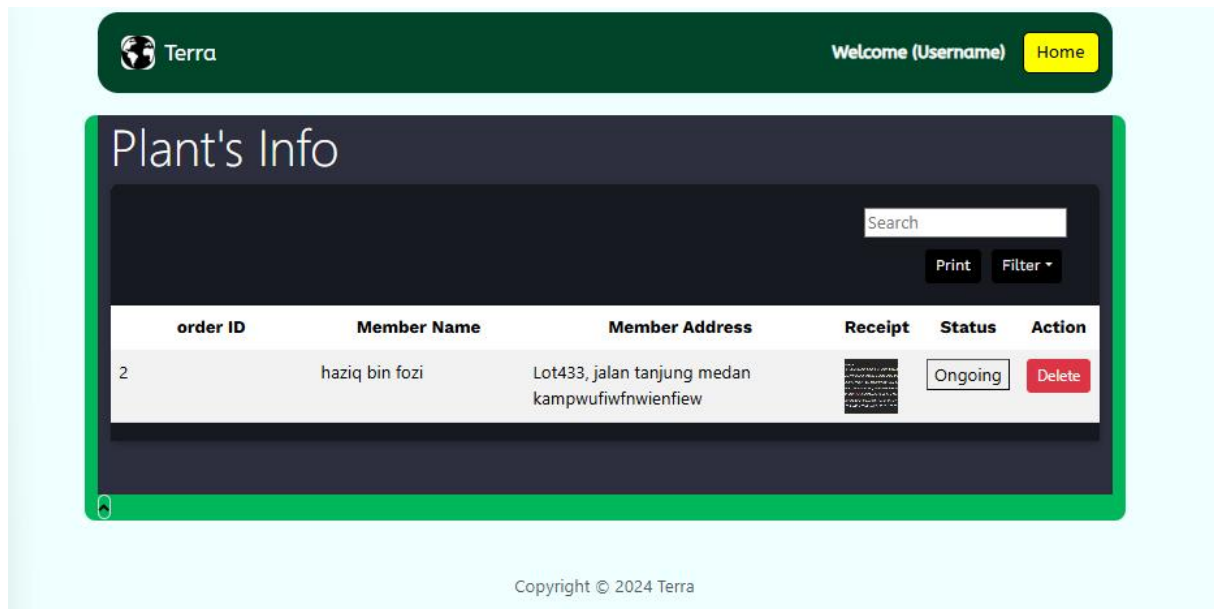

Plant Tutorial

Plant Image

 Current Image

2.5 Edit Plant Page

This page can edit any information on plant including the image of the plant

2.6 Manage Order Page

This page can see all the orders that has been made by users, Admin can change the status of the order to complete if the payment made by user has been verified. Also admin can delete the order.

The image shows a web form titled "Insert New Plant" centered on a solid green background. The form is a white rounded rectangle containing several input fields and buttons. The fields are labeled "Plant Name", "Plant Picture", "Plant Type", "Plant Description", "Plant Tutorial", "Plant Price", and "Admin ID". The "Plant Picture" field includes a "Choose File" button and the text "No file chosen". The "Plant Description" and "Plant Tutorial" fields have a small icon in the bottom right corner. Below the form fields is a large green "Insert Plant" button and a smaller yellow "Back" button.

2.7 Insert New Plant Page

This page allows admin to insert new Plant and add the info of the plant.

3. User

The image shows a user registration page for a website called 'Terra'. The page has a light blue background. At the top, there is a green header bar with the 'Terra' logo on the left, and 'Admin Home' and a 'Get in touch' button on the right. Below the header, there is a grey box with the text 'Join Our Community Today!' and a paragraph encouraging registration. Below this is a green box titled 'Create an Account!'. Inside this box, there are several input fields: 'Username', 'Email Address', 'Password', 'Repeat Password', 'First Name', 'Last Name', and 'Phone Number'. At the bottom of the green box is a blue 'Register Account' button and a link that says 'Already have an account? Login!'.

Pisang

Type: Fruit
Description: The banana fruit grows in hanging clusters called "hands," with each cluster containing several "fingers" (individual bananas). Bananas are typically yellow when ripe, although some varieties can be red, green, or even blue.
Tutorial: Plant a banana tree in sunny, well-drained soil. Dig a hole, place the plant upright, cover with soil, and water well. Keep the soil moist, fertilize monthly, and remove suckers. Harvest when bananas are plump and green.

Orange

Type: Fruit
Description: An orange is a round, juicy citrus fruit with bright orange skin and sweet, tangy flesh, rich in vitamin C.
Tutorial: Plant an orange tree in sunny, well-drained soil. Water regularly, fertilize, and harvest when fruits are bright and firm.

Cili

Type: Herb
Description: A chili plant is a small, bushy plant with green leaves and vibrant, tapered fruits that range in color from green to red. Known for its spicy flavor, it thrives in warm climates and is rich in vitamins A and C.
Tutorial: Plant chili seeds in warm, well-drained soil with plenty of sunlight. Water regularly, keep the soil moist, and fertilize occasionally. Harvest when the chilies are firm and brightly colored.

Durian

Type: Fruit
Description: Durian is a large, spiky fruit known for its strong odor and creamy, custard-like flesh. It has a hard, thorn-covered shell and yellow to pale orange pulp with a rich, sweet, and slightly bitter taste.
Tutorial: Plant durian seeds in well-drained, fertile soil with partial sunlight. Water regularly to keep the soil moist, and add organic fertilizer. Ensure proper spacing as durian trees grow large. Harvest when the fruit emits a strong aroma and starts to crack.

3.3 Homepage

After logging in, the User will be redirected to the Homepage, here it will show the plants that the users are interested..

HOW TO TANAM

Vegetables

- **Planting Season:** Vegetables usually have specific growing seasons. Warm-season veggies (like tomatoes and peppers) should be planted after the last frost, while cool-season veggies (like lettuce and carrots) can be planted in early spring or late fall.
- **Soil:** Vegetables thrive in nutrient-rich, well-draining soil. Add compost or fertilizer for better yields.
- **Spacing:** Follow specific spacing requirements for each vegetable to allow airflow and prevent overcrowding.
- **Watering:** Most vegetables need consistent watering. Aim to keep the soil evenly moist, especially during dry spells.

Fruits

- **Planting Season:** Plant fruit-bearing plants based on their requirements; for example, strawberries do well in early spring, while melons prefer warmer soil.
- **Soil:** Ensure slightly acidic, nutrient-rich soil for berries. Melons prefer sandy, well-drained soil.
- **Spacing:** Fruit plants usually need ample space to spread. Strawberries can be spaced closer together, but melons need several feet between plants.
- **Watering:** Keep soil consistently moist, especially when fruits are forming, but avoid waterlogged soil to prevent rot.

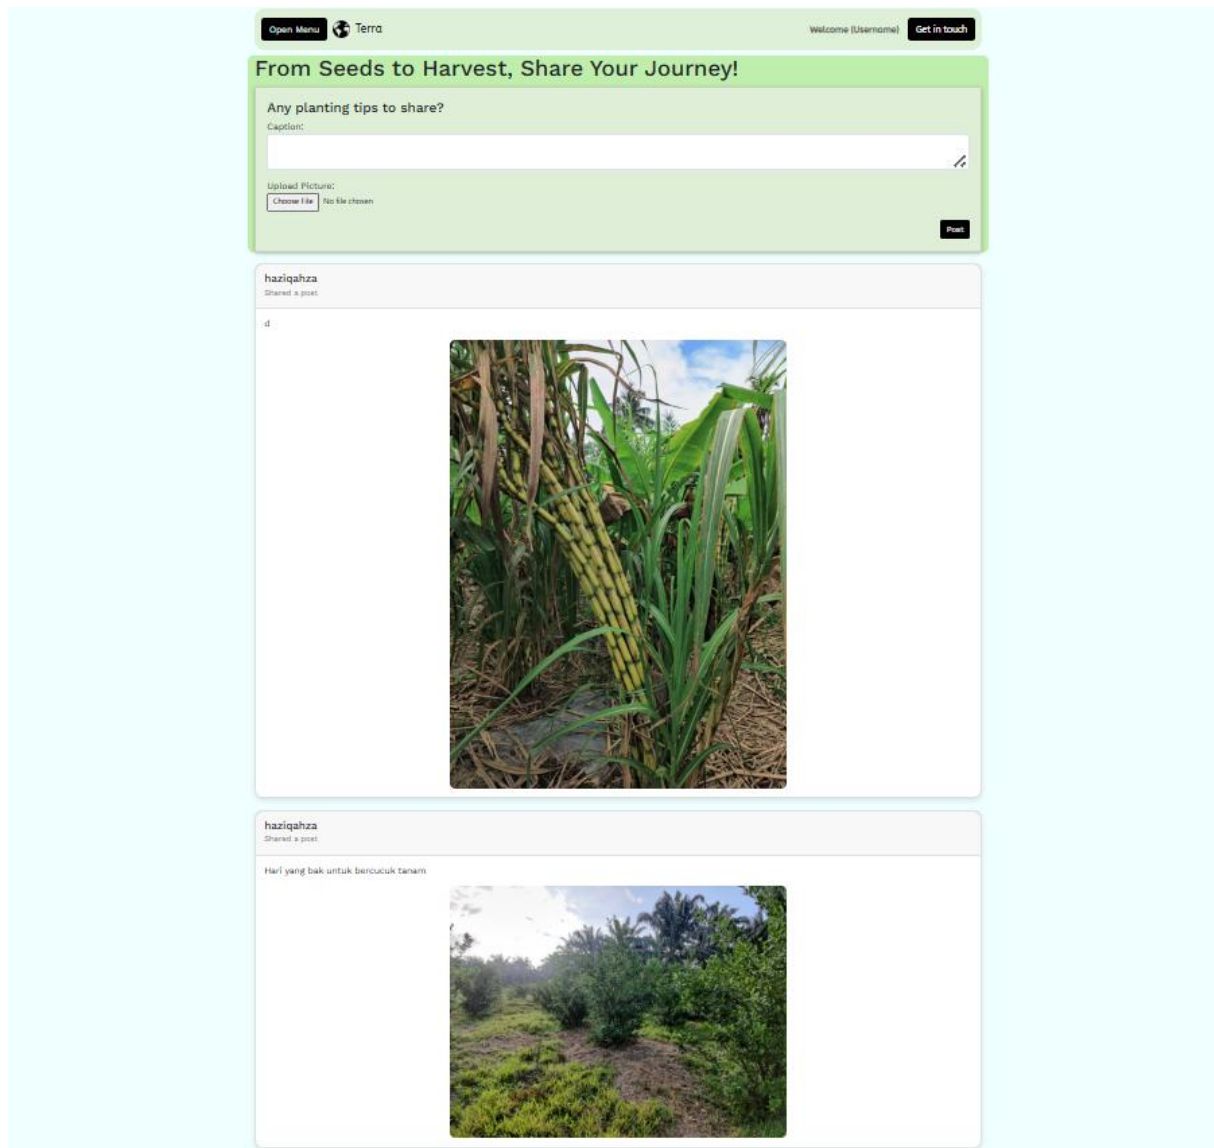

Herbs

- **Planting Season:** Herbs like basil and mint thrive in the warm season, while rosemary is quite hardy and can grow year-round in mild climates.
- **Soil:** Most herbs prefer well-draining soil. Adding sand to the soil mix can improve drainage for herbs like rosemary.

3.4 C How to Tanam Page

This page provides information on how to plant all types of plants.

3.5 User Feed Page

This Page allows user to upload image and caption about their journey on their planting activities in this page
